

LED Light Therapy

What is Dermalux LED Light Therapy?

At KG Beauty Salon in Whiteparish (near Salisbury), we offer Dermalux LED light therapy, a clinically proven light therapy treatment designed to improve skin health & rejuvenation.

This relaxing, non-invasive treatment uses therapeutic light energy to stimulate the skin's natural repair processes & enhance overall skin vitality.

Dermalux LED Light Therapy helps boost collagen production, calm inflammation & improve a variety of common skin concerns while promoting healthier, clearer & more radiant skin.

How Dermalux LED Light Therapy Works

Dermalux LED uses carefully controlled wavelengths of light that penetrate the skin at different depths to target specific skin concerns.

Red Light

Stimulates collagen & elastin production to help improve skin firmness and reduce the appearance of fine lines and wrinkles.

Blue Light

Helps reduce acne-causing bacteria & calm breakouts while reducing inflammation.

Near Infrared Light

Supports skin healing, reduces redness & promotes skin repair.

The treatment is completely painless, & many clients find it deeply relaxing.

Skin Concerns Dermalux LED Can Help With:

Dermalux LED Light Therapy can improve:

- Fine lines & wrinkles
- Acne & breakouts
- Redness & inflammation
- Dull or tired-looking skin
- Uneven skin tone
- Skin healing & repair
- Overall skin rejuvenation

The treatment is suitable for most skin types & can be customised depending on your skin concerns.

What to Expect During Your Treatment

Your skin will be gently cleansed before the treatment begins.

Protective eye shields will be provided & the Dermalux LED device is positioned comfortably above the face.

You can simply relax while the light therapy works on the skin.

The treatment usually lasts around 20–30 minutes & can be added to other facial or advanced skin treatments.

Downtime

Dermalux LED Light Therapy has no downtime, making it an ideal treatment for clients looking for a quick skin boost.

After treatment, you may notice:

- Brighter, glowing skin
- Reduced redness
- Skin feels calmer and more hydrated

You can return to normal daily activities immediately after your treatment.

Treatment Results

Many clients notice an improvement in their skin after the first treatment.

For best results, a course of treatments may be recommended depending on your skin goals.

Dermalux LED Light Therapy is also an excellent way to maintain healthy skin & enhance results from other treatments such as; facials, microneedling & advanced skin treatments offered at KG Beauty Salon.
