

# Brow Treatments

At KG Beauty Salon in Whiteparish (near Salisbury), we offer professional brow treatments designed to enhance the shape, fullness & definition of your natural brows.

Whether you want fuller-looking brows, a cleaner shape or more definition, our treatments are tailored to suit your face shape & personal style.

Our brow services include brow lamination, brow shaping & brow tinting, helping you achieve beautifully defined brows with long-lasting results.

## What is Brow Lamination?

Brow lamination is a popular treatment designed to create fuller, more defined brows by applying a lifting & fixing chemical lotion (as used in lash-lifting) to smooth & reposition the brow hairs into the desired shape.

The treatment helps to straighten & set the brow hairs in place, creating a more uniform & fuller appearance.

It is ideal for brows that grow unevenly, have gaps or appear flat.

## Benefits of Brow Lamination

- Creates fuller-looking brows
- Smooths & lifts brow hairs
- Helps improve brow shape
- Tames unruly or uneven brows
- Long-lasting results

## How Long Does Brow Lamination Last?

Results typically last 6–8 weeks, depending on your natural hair growth cycle & aftercare.

## Brow Shaping

Brow shaping is designed to create a clean, balanced brow shape that complements your facial features.

Using professional products (Lyon Wax) unwanted hairs are carefully removed to define the brow line while maintaining a natural and flattering shape.

## **Benefits of Brow Shaping**

- Creates a clean & defined brow shape
- Enhances facial features
- Maintains a natural brow appearance
- Keeps brows neat and well-groomed
- Regular brow shaping appointments help maintain the ideal brow shape.

## **Brow Tinting**

- Brow tinting enhances the colour & definition of the brows using a semi-permanent dye.
- This treatment is ideal for clients with lighter brows or those wanting more defined brows without daily makeup.
- Benefits of Brow Tinting
- Darkens & defines brows
- Creates fuller-looking brows
- Reduces the need for brow makeup
- Enhances natural brow shape
- Tinting results typically last 3–4 weeks, depending on skin type & aftercare.

## **Aftercare Advice**

To maintain the best results from your brow treatments:

- Avoid getting brows wet for 24 hours after lamination or tinting
- Avoid excessive heat, steam or saunas for the first 24 hours
- Apply nourishing brow oil if recommended
- Avoid rubbing or touching the brow area

Following proper aftercare will help maintain beautifully shaped brows for longer.

**\*PLEASE NOTE A PATCH TEST IS REQUIRED AT LEAST 48 X HOURS PRIOR YOUR APPOINTMENT\***
