

Hydro Fire & Ice Facials

What is a Fire & Ice Facial?

The Fire & Ice Facial is a powerful resurfacing & rejuvenating treatment designed to rapidly improve skin texture, clarity, & radiance.

Using professional HydroPeptide skincare, this facial combines advanced active ingredients with soothing hydration to deliver visible results.

The treatment begins with the “Fire” phase, which uses carefully selected exfoliating ingredients to stimulate the skin, increase circulation & encourage cell renewal.

This step helps smooth rough texture, brighten the complexion & refine pores.

Next comes the “Ice” phase, a calming & deeply hydrating stage that cools, soothes & nourishes the skin.

Peptide-rich products help restore balance, support collagen production & leave the skin feeling refreshed, revitalised & glowing.

Benefits of the Fire & Ice Facial

- Brightens & refreshes dull skin
- Improves skin texture & tone
- Softens fine lines & wrinkles
- Boosts hydration & radiance
- Supports collagen production
- Leaves skin smooth, glowing & rejuvenated

This treatment is ideal for clients looking for a results-driven facial with no downtime, making it perfect before special occasions or as part of a regular skincare routine.

At KG Beauty Salon in Whiteparish (near Salisbury), the Fire & Ice Facial is tailored to your individual skin needs to deliver glowing, healthy-looking skin!
