

# Hydropeptide Skin Peels

## What are Hydropeptide Skin Peels?

At KG Beauty Salon in Whiteparish (near Salisbury), we offer professional HydroPeptide skin peels designed to gently resurface the skin & improve overall skin health.

HydroPeptide peels combine advanced exfoliating acids with powerful peptides & soothing ingredients to renew the skin while maintaining hydration & comfort.

These professional treatments help remove dull surface skin cells, stimulate cell turnover & reveal a smoother, brighter complexion.

HydroPeptide peels are suitable for a wide range of skin concerns & can be tailored to suit your individual skin type.

## What HydroPeptide Skin Peels Can Help With

HydroPeptide skin peels can improve:

- Dull or tired-looking skin
- Uneven skin tone
- Fine lines & wrinkles
- Mild pigmentation & sun damage
- Congested or acne-prone skin
- Rough or uneven skin texture

The treatment helps reveal healthier, brighter & more radiant skin.

## What to Expect During Your Treatment

Your skin will first be cleansed & prepped before the HydroPeptide peel solution is applied. The peel works to gently exfoliate the skin & stimulate cell renewal.

During the treatment, you may experience a mild tingling or warming sensation as the peel begins to work.

After the peel has been neutralised, calming & hydrating skincare products are applied to soothe the skin. The treatment typically takes around 45–60 minutes.

## **Downtime**

HydroPeptide skin peels are designed to be effective while remaining gentle on the skin.

After the treatment, you may experience:

- Mild redness
- Slight tightness or dryness
- Light flaking or peeling over the following few days

Most clients experience minimal downtime, & normal daily activities can usually be resumed straight after treatment.

It is not recommended to avoid sweating & heat: Avoid saunas, hot tubs & intense exercise for at least 72 x hours to prevent inflammation & sensitivity.

Wait at least 2 x weeks before having any other facial treatments like facial waxing or microneedling. It is important to follow aftercare advice, including using SPF50-30 & avoiding direct sun exposure.

## **Treatment Results**

Many clients notice brighter, smoother skin after just one treatment.

For optimal results, a course of treatments may be recommended depending on your skin concerns.

HydroPeptide skin peels can also be combined with other advanced treatments offered at KG Beauty Salon in Whiteparish (near Salisbury) to enhance results and support long-term skin health.
