

Dermaplaning

Dermaplaning

Dermaplaning is a gentle, non-invasive skin treatment that removes dead skin cells & fine vellus facial hair (often called “peach fuzz”) from the surface of the skin using a specialised sterile blade.

This exfoliation reveals smoother, brighter & more radiant skin.

At KG Beauty Salon, dermaplaning helps refresh the complexion while allowing skincare products to penetrate more effectively.

Benefits of Dermaplaning - Dermaplaning can help to:

- Remove dull, dead skin cells
- Improve skin texture & smoothness
- Brighten & refresh the complexion
- Reduce the appearance of fine lines
- Help skincare products absorb more effectively
- Create a smooth base for makeup

The treatment reveals fresh new skin, helping the complexion appear healthier & more radiant.

What to Expect During Treatment:

- Your skin will first be cleansed & prepped, ready for your treatment
- A disposable sterile blade is then gently moved across the skin to remove dead skin cells & fine hair
- The treatment is painless and typically takes around 30-45 minutes

Downtime:

Dermaplaning has little to no downtime, meaning most clients can return to normal activities straight away.

You may experience:

- Mild redness immediately after treatment
- Slight skin sensitivity

These effects usually settle quickly.

Aftercare Advice:

After dermaplaning, it is recommended to:

- Avoid direct sun exposure for 24-48 hours
- Use gentle skincare products
- Apply daily SPF protection
- Keep the skin well hydrated

Results typically last 3-4 weeks, depending on your skin type & skincare routine.
